

# Bash Tutorials - Looping with Numbers

## Problem Statement

For loops in Bash can be used in several ways: - iterating between two integers **a** and **b** - iterating between two integer **a** and **b** and incrementing by **c** each time - iterating through the elements of an array, etc.

Use for loops to display the natural numbers 1 to 50.

## Input

*There is no input*

## Output

```
1
2
3
4
5
.
.
.
.
50
```

## Recommended Resources

A quick but useful tutorial for bash newcomers is [here](#).

Handling input is documented and explained quite well on [this page](#).

Different ways in which for loops may be used are explained with examples [here](#).
