Project Euler #4: Largest palindrome product

Problem Statement

This problem is a programming version of Problem 4 from projecteuler.net

A palindromic number reads the same both ways. The smallest 6 digit palindrome made from the product of two 3-digit numbers is $101101=143\times707$.

Find the largest palindrome made from the product of two 3-digit numbers which is less than N.

Input Format

First line contains T that denotes the number of test cases. This is followed by T lines, each containing an integer, N.

Output Format

Print the required answer for each test case in a new line.

Constraints

 $\begin{array}{l} 1 \leq T \leq 100 \\ 101101 < N < 1000000 \end{array}$

Sample Input

2 101110 800000

Sample Output

101101 793397
